

Relay integrates with Platform Science!

- **Seamless Setup—Zero Friction**

Relay is integrated directly into Platform Science's marketplace, so admins can quickly deploy Relay onto the Platform Science tablets, onboard drivers and enable SSO to eliminate extra logins for drivers.

- **Real-Time Fleet Visibility**

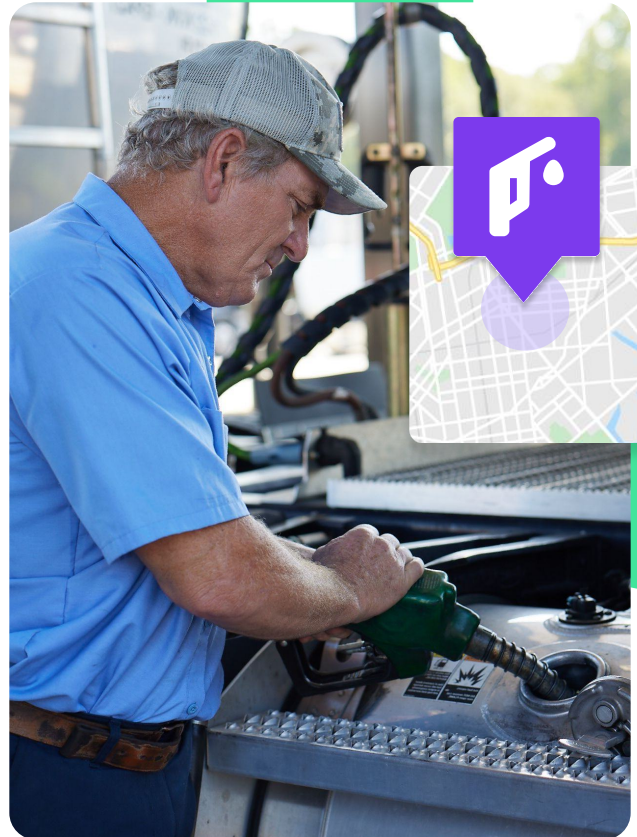

Sync driver information including truck number and odometer data automatically across systems, giving carriers a single, up-to-date view of their fleet.

- **Stronger Fraud Protection**

Relay Pulse connects driver status, truck location, and fuel levels to help detect and prevent first-party fuel fraud in real time.

When you fuel with Relay you can:

- Reduce fraud with strict controls, monitoring, and innovative geofencing technology
- Take advantage of Relay's Clutch Program for discounted fuel, and use any existing discounts you directly negotiated with merchants
- Allow drivers to conveniently locate on-route truck stops and discounts from Relay's app
- Instantly enable digital payments across your fleet without lengthy activations

350,000+

carriers and drivers using Relay
